General questions

01 What are the technical requirements for using the AirPlus Portal?

We recommend to:

- use the latest version of Google Chrome, Internet Explorer, or Mozilla Firefox
- enable JavaScript
- accept all cookies

02 The AirPlus Portal is not displayed correctly. How do I fix this?

- Make sure your browser is updated to the latest version.
- Check your browser settings to make sure that JavaScript and cookies are enabled.
- Clear your browser cache, delete cookies, and refresh the page.

03 Automatic Logout

Your session in the portal expires after **15 minutes** of inactivity.
You need to enter a new TAN to log back into the Portal.

04 Change password

In the drop-down menu of your user profile (at the top right in the navigation) go to **Login settings** > **Change password**.
To begin the password reset process, you need to enter the new password twice and login again.

05 Forgot password

If you have forgotten your password, please use the **Forgot password** function on the login page. You will be asked to enter the e-mail address that you use to access the AirPlus Portal. You will then receive an e-mail with further instructions to reset your password.

06 Change e-mail address

Please contact our AirPlus Service Team to change your e-mail address.
Please note that changing your e-mail address also changes your login user name.

07	View and edit bank details As a Card User with Corporate Card Type 2 or 3, you can view and edit the bank details of your AirPlus Corporate Card(s) in your security settings menu under Bank Details. You can enter different bank details for different cards. The SEPA (direct debit) yes/no display indicates whether you are already using direct debit. By editing bank details, you confirm direct debit authorization. If your SEPA authorization expires, you will be notified in advance and be able to renew it online. Note: You can change your bank details even if a card is blocked or in VIP status.
08	Add or edit phone numbers In the profile settings of your user profile (drop-down menu at the top right) you can enter up to 2 phone numbers. This way you can set up two different 3D Secure profiles using a private and a business phone number. Editing a phone number requires confirmation via TAN (one-time password). Please note: If you edit your primary phone number, it will automatically be used for your 3D Secure profile.
09	When do I need to enter a TAN (one-time password)? The following processes require an additional authentication step using TAN confirmation in the AirPlus Portal: • Login • Editing/adding phone numbers in personal profiles • Changing your name • Viewing or changing the AirPlus Corporate Card PIN* • Requesting card lists with full card numbers For security reasons, authentication must be performed again after 15 minutes. The TAN is sent for all roles via SMS or e-mail. This default selection can be changed in the personal profile. *TAN code only send via SMS.

10	What is a TAN code? A TAN is a transaction number that you receive via SMS or e-mail to confirm a process. It is a one-time password consisting of six digits. TANs are a security measure to provide an additional authentication step when confirming a process.
11	Usage of an Authenticator Two-factor authentication is an additional security level for logging into the AirPlus Portal, in addition to your e-mail address and password. You can use a TAN process for this, whereby we send you the TAN via e-mail or SMS, or authentication via a commercially available Authenticator. If you already use an Authenticator in your company (e.g. Microsoft Authenticator, KeePass, FreeOTP, Google Authenticator) – either on your PC or on a company mobile phone – you can simply register your authenticator app in the AirPlus Portal and use it to log in: • To register, go to Login Settings in your profile menu. • Click on Manage Authenticator > Add Authenticator. • Open your authenticator at the same time. • Scan the QR code or click on the link Scanning not possible. Further information can be found on our landing page, which describes all three login methods in more detail: Portal-two-factor-authentication
12	What is 3D Secure? The 3D Secure service is necessary for online payments and ensures your security. Your 3D Secure profile(s) either uses a TAN via SMS or biometric authentication (e. g. fingerprint) to verify your identity for online transactions. A security question and corresponding answer are also stored in the profile. 3D Secure profiles require a cell phone number. Be sure to include your international country code when entering your number, e. g. +49 123 4567890. You can create multiple 3D Secure profiles by individually assigning different names and cards to each profile. You can set one profile as the default. 3D Secure profiles are necessary to make online purchases using AirPlus Corporate Cards and AirPlus Virtual Cards Multi-Use. If you have more than one 3D Secure profile, you will be able to see the function 'delete profile'. You can delete all profiles except your 'Default 3D Secure Profile'. Make sure that there are no

	AirPlus Corporate Cards or active Virtual Cards connected to a 3D Secure Profile before deleting it.
13	Can I use the Portal on my cell phone? We have optimized the Portal for mobile use, especially for Card Users of the AirPlus Corporate Card. To access the Portal, enter the following address into browser: https://businesstravelportal.airplus.com. Additionally, AirPlus offers the AirPlus Mobile App, that grants biometric authentication for online payments (3D Secure) and mobile payments (Apple Pay and Google Pay). Once you have used the AirPlus Mobile App you can view all 'Connected devices' in an overview. The overview can be found in your profile settings. It shows the device name, the linked 3D Secure profile and the last login. You can unpair a device in the 'Connected devices overview' by clicking on 'Unpair'.
14	What is the 'Card Control' function? AirPlus Card Control is a security function that offers constant transaction control – even on the road. AirPlus Card Control will allow you to: • Get real-time e-mail notifications on all authorized transactions. • Immediately identify card misuse and avert potential losses. If a Card User (Corporate Card) activates Card Control in the security settings, they will receive an e-mail as soon as the card executes an authorization. You can activate or deactivate the Card Control function at any time. Notifications will be sent to your login e-mail address.
15	Where can I adjust my notification settings for new documents or events? You can adjust the notifications you wish to receive from AirPlus in your personal profile (top right) under Notification Settings, e. g.: • when new documents or Electronic Billing files are available*, or • when a virtual card has been blocked. More options to activate or deactivate notifications are coming soon. *Not valid for AirPlus Corporate Card(s) Type 1, Type 2 and Type 3.

16	Where can I read about new Portal features from AirPlus?
	You can find the newest Portal features in the Latest product developments link in your profile at the top right corner.
17	Can I give my products their own names to distinguish them?
	All products with configuration details are displayed under the Frameworks tab and in the Create Framework process. Here you can assign a descriptive name for each product.

Questions regarding Roles and Rights

01 What is an user role in the AirPlus Portal?

User roles represent a summary of different permissions for functions and data access within the AirPlus Portal.

Each user in the AirPlus Portal is assigned one or more roles, each with predefined functions. All Portal functions can be assigned and executed via these predefined roles. Each user is assigned to certain agreements, products, frameworks or cards*.

If a user has more than one role, they can switch between them using the **Change Portal view** function in their profile menu.

The new AirPlus Portal uses the following roles:

- Program Manager (PM)
- Portal Administrator (PA)
- Card Administrator (CA)
- Electronic Billing User (EBU)
- Accountant (ACC)
- Intelligence User (IU)
- Card User (Corporate Card) (CUC)
- Card User (Virtual Cards) (CUV)
- Program Manager (Travel Agency) (PM TA)
- Portal Administrator (Travel Agency) (PA TA)
- Card Administrator (Travel Agency) (CA TA)
- Data Quality Administrator (Travel Agency) (DQA TA)
- Upload Manager (Travel Agency) (UM TA)

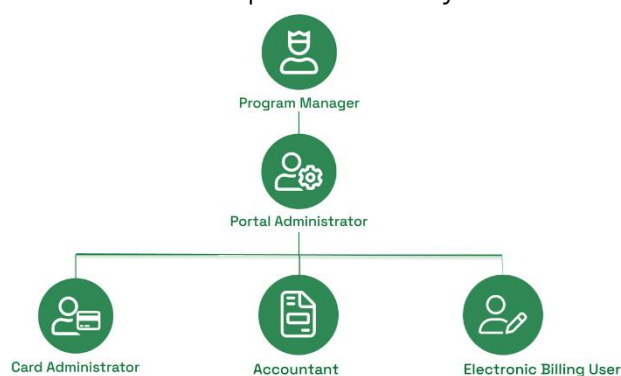

You can find more information on user roles and rights in the AirPlus Portal in our '[Roles & Rights User Guide](#)' available as a PDF in the 'Important Documents' section.

* Important: The assignment on card level is only applicable for Lodged Products and the roles Card Administrator and Accountant. In case a Card Administrator got only rights on card/Account level, he cannot order new cards/Accounts.

02 The portal role 'Program Manager'

The **Program Manager** is the primary portal user, acting as a super user for the company and possessing the highest level of rights.

The Program Manager sets up the **company structure** in the Portal, e. g. by creating administrative users for various departments. They can also assign Portal Administrators.

Program Managers can:

- View the company's Subscriber Agreements with the business partner limit and all associated AirPlus products
- View company bank details
- View the full card number of AirPlus Company Accounts/AirPlus Debit Accounts/AirPlus Travel Trade Accounts (PDF)
- View reminders and letters of termination
- View reports
- Access AirPlus Intelligence
- Assign rights to third-parties and
- Perform all functions of the following roles.

03 The portal role 'Portal Administrator'

As the second highest functional level, the **Portal Administrator** has extensive user rights in the Portal. They can order new AirPlus frameworks in accordance with associated agreements and can view and download the documents with the full card number of AirPlus Company Accounts*.

They can have access to all available products, frameworks and cards, or be restricted to specific ones.

	The Portal Administrator manages all subordinate user levels: they can manage users and assign card programs. This role also has access to various reporting functions, AirPlus Intelligence and all functionalities of subordinate roles. *Same for AirPlus Debit Accounts or AirPlus Travel Trade Accounts.
04	The portal role 'Card Administrator' The Card Administrator manages assigned card programs. This role can: • Generate Virtual Cards • Administer card applications for AirPlus Corporate Cards • View generated cards, authorizations, and transactions in different overviews, according to their assigned rights • Adjust card settings • Customize Descriptive Billing Information (DBI) • Enhance DBI content on the transaction level of AirPlus Company Accounts • Block cards permanently • Start disputes • Administer users (only for Corporate Cards) This role can be assigned to specific cards for lodged products.
05	The portal role 'Card User (Corporate Card)' The Card User (Corporate Card) is a cardholder of AirPlus Corporate Card, AirPlus Office Card or AirPlus Private Card. This role can: • View authorized, pending, and invoiced transactions • View and download statements • View or change PIN • View card limits (and pending on card type also edit) • Change security settings for cards • Creating 3D Secure profile(s)

	• Dispute transactions • Block cards temporarily or permanently • Order replacement cards • Change bank details* *Only for AirPlus Corporate Card Type 2 and 3 and Private Card.
06 The portal role 'Card User (Virtual Cards)'	
	The Card User (Virtual Cards) has access to AirPlus Virtual Cards. This role can: • Create virtual cards within their given budget and time period • View virtual cards • View authorizations and transactions • Edit security settings: Descriptive Billing Information (DBI) and expiration date • Create 3D Secure profile(s) • Dispute transactions • Block cards permanently As Program Manager or Portal Administrator you can create Card Users (Virtual Cards) with access to the AirPlus Virtual Cards products (Classic, Procurement and Travel Trade).
07 The portal role 'Accountant'	
	The Accountant can download statements as PDF for their assigned products or frameworks. They can also access dunning letters. He also has access to payment reminders and other financial documents. He can also view authorizations and transactions, as well as dispute transactions. This role can be assigned to specific cards for lodged products.
08 The portal role 'Electronic Billing User'	
	The Electronic Billing User can download statements (PDF) and Electronic Billing files in various formats for assigned products or frameworks.

09 The portal role 'Intelligence User'

The **Intelligence User** has access to AirPlus Intelligence Hub and other modules like AirPlus Intelligence Data+, if applicable.
By default, the role only sees anonymized data in AirPlus Intelligence.

10 How can I change my Portal view?

Users with multiple roles can use the function **Change Portal view** in their **profile** menu (top right) to switch between their roles, and therefore change the layout and portal functions.

If a company has several agreements with AirPlus, administrative users can switch between legal entities on the start page. Make sure the correct role is selected.

The limit for your agreements is only visible to the roles Program Manager and Portal Administrator. In the overview **All Agreements**, you can mark up to three agreements as favorites (★ star icon) which are displayed at the top of the overview.

11 How can I create a new user and assign roles and rights?

Program Manager, Portal Administrator, and in some cases Card Administrator can create new users and assign rights.

How to create a single, new user:

1. Use the function **New User/New Assignment** (in the **User Management** tab)
2. Click on **Single user**
3. Fill in the information: first name, last name, e-mail address.
4. Select one or more roles.
5. Assign agreements/products/frameworks/cards to the new user.
6. Check and confirm your entries.

A new user can be assigned multiple administrative roles at once in a single step. (However, this does not apply to Card User roles.) Existing users can also be assigned an additional role or have a role revoked.

Once you confirm, the new Portal user will receive an invitation e-mail from AirPlus with a registration link to the AirPlus Portal.

The permissions and roles of an administrative user can also be copied: both for existing users and for new users. To do this, there is a submenu '**Copy roles & rights**' in the action menu (3-dot icon) behind a user entry.

12 How can I create a 'Card User (Corporate Card)'?

Administrative Users can create a new Card User (Corporate Card) as following:

1. Use the function 'Create New Card' on the **Cards** tab
2. Fill in the user's information and select Card User (Corporate Card).
3. Select agreement, product and framework.
4. Fill In the limit and if applicable cash withdrawal profile
5. Fill in the user's DBI.
6. Check and confirm your entries.

Once you confirm, the new Portal user will receive an invitation e-mail from AirPlus with a registration link (valid up to 30 days) to the AirPlus Portal. After the registration of the new user, the administrative user receives an approval request on the homepage.

(Program Managers, Portal Administrators and Card Administrators can waive this approval step by checking the box indicating no approval is required when confirming a Card User's creation.

However, this is only possible if a default limit is set on the framework.)

Please note:

- If a Card User does not complete the card application within 30 days, their application will be deactivated.
- Certain countries offer different AirPlus Corporate Card types. In particular, AirPlus Corporate Cards Type 3 can only be issued to users residing in the country of the agreement.

13 How can I create several Card Users (Corporate Card) at once?

Program Managers, Portal Administrators and Card Administrators can use the **Bulk Upload Procedure** to upload several Card Users (Corporate Card) in the Portal at once.

The process includes the following steps:

1. Navigate through the following tabs: **User Management > New User/New Assignment > Create Multiple Card Users**
2. Choose an agreement, product, or framework
3. Upload an Excel file with the new Card Users. A template for the Excel file is available for download. In this Excel:
 - Enter a desired limit per Card User
 - Enter the desired Descriptive Billing Information (DBI: cost center, ID number, etc.)
 - Cash withdrawals are allocated according to the agreement terms
4. The list of uploaded users is displayed with their status
5. Select a shipping option for new cards

	New Card Users will be automatically informed via e-mail and sent a link to start the card application process. Program Managers, Portal Administrators or Card Administrators can waive the approval by checking the box indicating no approval is required when confirming a Card User's creation. However, this is only possible if a default limit is set on the framework and the card limit entered is not higher than the default limit. The status of uploaded files and Card Users can be viewed at any time on the tab Cards > Link 'Card Status Management' > Status of Bulk Users.
14	How can I assign functionalities and permissions to third-parties or partners? Program Manager and Portal Administrators can assign rights to third-parties or partners (such as travel agencies and shared service centers) to work on their behalf. The following role can be assigned to third-parties/partners and given permissions on the card program: Intelligence User. To assign roles to third-parties/partners, go to the User Management click on New User/New Assignment > select Single User > then enter the user data and select the corresponding role. The system recognizes that the user already exists under another business partner and displays the name of the business partner. If the business partner's details are correct, the user can click on 'Yes, assign role'. After assigning rights, the user must confirm a data protection warning again. The users of third-parties/partners can be found in the External Users tab. These users can neither be deactivated nor assigned additional roles. However, access rights can be revoked at any time. After successful revocation, the user is no longer in the view.
15	Can I revoke roles and rights? Yes, administrative users can delete assigned agreements, products, frameworks, and cards in the User Management tab. They can also deactivate users.
16	What does it mean to deactivate a Portal user? An administrative user can deactivate another Portal user in the User Management section. Deactivated users will no longer be able to log into the Portal and all framework and role assignments will be removed.

	Important to know: Portal Administrators can only remove assignment rights from users who have a role lower than their own (e.g. Card Administrator or Accountant).
17	How can I deactivate a Portal user? Only administrative users can deactivate other Portal users completely. However, no user can deactivate users with a higher role than them. For example, a Portal Administrator can be deactivated by a Program Manager, but not by a Card Administrator. A Card Administrator can be deleted by a Portal Administrator or a Program Manager. In addition, the rights assignments must be taken into account: For example, a Portal Administrator can only deactivate a Card Administrator if the Portal Administrator has the same or more extensive rights as the Card Administrator.
18	Are Portal Administrators automatically authorized to download Electronic Billing files? Portal Administrators, Program Managers and Electronic Billing Users can download Electronic Billing files. However, only Program Managers have the automatic right to download all data, including Electronic Billing data, if included in the company's AirPlus agreement. Other users (e. g. Portal Administrator, Electronic Billing User) only have the right to download data once that right on agreement, product or framework level is assigned to them.
19	What functions need approval? In the AirPlus Portal, two processes require approval from Program Managers or Portal Administrators: • Creating new frameworks or modifying existing ones with the AirPlus Service Team • Create new AirPlus Company Accounts/AirPlus Debit Accounts/AirPlus Travel Trade Accounts or change of existing AirPlus Company Accounts/AirPlus Debit Accounts/AirPlus Travel Trade Accounts via the AirPlus Serviceteam • Applying for a new AirPlus Corporate Card
20	How do I approve a framework? Program Managers or Portal Administrators will receive a notification about pending approvals for frameworks in the box 'Approvals for frameworks' on the homepage. By clicking on the small information box, you will be forwarded to the Frameworks tab and will see a list of all open approvals. You can view the framework details and approve or reject them. Please note: approval must be given within 30 days of the initial request.

21	How do I approve an application for an AirPlus Corporate Card?
	Program Managers or Portal Administrators will receive a notification about pending applications in the box 'Approvals for AirPlus Corporate Cards' on the homepage. Clicking on the small information box will take you to the Card Application Status page and list all open approvals. Here you can approve or reject the respective card application. Please note: approval must be given within 30 days of the initial request. For example, if the card application requested by the Card User is not approved within 30 days, it will be deactivated and the card will not be created. If the card is still needed, a new card application must be generated. Program Managers, Portal Administrators and Card Administrators can waive this approval step by checking the box indicating no approval is required when confirming a Card User's creation. However, this is only possible if a default limit is set on the framework.
22	How can I change the Descriptive Billing Information (DBI) for my Card Users?
	Administrative users can change supplementary data (DBI) for Card Users with the following steps: • Go to Settings from the action icon on the Cards tab from the respective AirPlus Corporate Card and adjust the DBI. • If you want to change the DBI for all Card Users belonging to a specific framework, go to Bulk Update on DBI in the Frameworks tab from the respective AirPlus Corporate Card framework. Select the framework's active Card Users including the DBI you wish to change and do so accordingly. To change other card settings, see the question 'Which card settings are available to administrative users for the different AirPlus Corporate Card types?'
23	How can I access an overview of all Portal users?
	Find all users listed with name, e-mail address, role, agreement assignment, rights, and more in the User Management tab. If your company has several agreements, you will also see users under the other agreements. The overview provides two views: • In the Users in Agreement view, you can see which users have been created under the agreement selected in the left-hand pane.

- In the **Users with access to Agreement** view, you can see which users have been assigned an authorization for the contract selected in the left-hand pane.
- In both areas, you can use the detailed view (icon ) to see when the user was created, by whom and which role they have with which authorizations.
- Furthermore, you can search for specific users, filter by role and perform functions at user or authorization level using the icon  .

Use the **Actions** button at the top right to print the list or **export** it as an Excel file.

Questions regarding AirPlus frameworks

01 What is the AirPlus Framework Number?

The **AirPlus Framework Number** is automatically assigned by AirPlus during the ordering process of new AirPlus **Frameworks**. Define a descriptive name for each framework that you use, for instance, to differentiate frameworks by legal entity. Both the descriptive name and the AirPlus Framework Number clarify your AirPlus framework assignments. AirPlus Framework Numbers reflect your company's **accounting unit hierarchy**, such as sales and marketing divisions.

Use AirPlus framework numbers to search for your assigned AirPlus frameworks in the Portal. This number is also displayed on your AirPlus statements.

02 What is the difference between agreement, framework, and card?

Your company has signed an **agreement** (Subscriber Agreement) with AirPlus that includes all associated AirPlus products.

For each contractually agreed AirPlus product, you can order a new **AirPlus frameworks** in the AirPlus Portal under **Frameworks**. You can order separate AirPlus frameworks for each accounting unit in your company. This adapts your framework structure to your company hierarchy and needs.

The payment itself is done on the lowest hierarchy level, the card level.
Also mentioned as payment instrument.

Administrative users can create and view new cards within the AirPlus frameworks they are assigned.

03 How can I order a new framework for my AirPlus Company Account*?

AirPlus offers an automated order process for new AirPlus frameworks in the AirPlus Portal. The Program Manager and Portal Administrator roles can order new frameworks under the **Frameworks** tab. The requested framework will be available for use in the Portal shortly after the order is accepted to generate new Accounts underneath.

Right at the beginning of the process you will find a '**Framework Creation Checklist**'. This checklist explains which steps and information you will need for the framework creation process.

You will have to configure the following settings:

1. General set-up:

- Definition of a descriptive name

2. Configuration of the Descriptive Billing Information (DBI) fields

- Field selection
- Field length (min/max)
- Format
- Name on statement
- Mandatory field yes/no

3. Definition of statement layout

4. Definition of invoicing terms

5. Definition of Electronic Billing set-up

6. Definition of limit

7. Confirmation of the order

Contractually determined fees are displayed in the last step of the order form.

When creating a new framework, the entries can be saved as a **draft** for two days. If required, the draft can be edited further or deleted (action menu: '**Delete draft**').

AirPlus can also create a new framework for an AirPlus Company Account on your behalf. In this case, the Program Manager or Portal Administrator must approve the new framework.

To do this, the Program Manager or Portal Administrator should click on '**Approve**' box at the top right of the AirPlus Company Account start page. The frameworks that are waiting for approval will appear in that box. By clicking on the box, the user will see all cards that need to be approved. They can view the details of the new card and approve or decline it.

*Same for AirPlus Debit Accounts or AirPlus Travel Trade Accounts.

04 How can I order a new framework for AirPlus Virtual Cards?

AirPlus offers an automated order process for new AirPlus frameworks in the AirPlus Portal. You can order new frameworks under the **Frameworks** tab. The requested framework will be available for use in the Portal shortly after the order is accepted.

Right at the beginning of the process you will find a '**Framework Creation Checklist**'. This checklist explains which steps and information you will need for the framework creation process.

Take the following steps to order a new framework for **AirPlus Virtual Cards**:

1. Descriptive name (select agreement/product and enter a descriptive name)
2. Descriptive Billing Information (select and define what DBIs should be displayed, in what format, and with what statement header)
3. Statement configuration
4. Billing (cycle, date, and currency) - depending on agreement configuration
5. Electronic Billing: select Electronic Billing data deliveries (if applied for in the agreement)
6. Framework configuration (set a framework limit)
7. Confirm order

Contractually determined fees are displayed in the last step of the order form.

When creating a new framework, the entries can be saved as a **draft** for two days.

If you or AirPlus (on your behalf) order the **first AirPlus Virtual Cards framework** as part of an agreement (product), you must first enter some details regarding the 'Purpose of card usage'.

05 How can I order a new framework for AirPlus Corporate Cards?

AirPlus offers an automated order process for new AirPlus frameworks in the AirPlus Portal. You can order new frameworks under the **Frameworks** tab. The requested framework will be available for use in the Portal shortly after the order is accepted.

Right at the beginning of the process you will find a '**Framework Creation Checklist**'. This checklist explains which steps and information you will need for the framework creation process.

Take the following steps to order a new framework for **AirPlus Corporate Cards (e. g. for Type 1 and 2)***:

1. Descriptive name (select agreement/product and enter a descriptive name)
2. Descriptive Billing Information (select and define what DBIs should be displayed, in what format, and with what statement header)
3. Billing (cycle, date, and allocated agreement fees)
4. Activation and selection of Electronic Billing data deliveries (if included in the agreement)
 1. Framework configuration: Define the company name and framework limits and select the shipment option
 2. Card configuration: Select the preferred language for the card application, upload a company logo**, and define the default card limit (a default limit is mandatory for AirPlus Corporate Cards Type 1 and 2)

	3. Card settings***: define transaction limit, velocity, regions/countries, select the cash withdrawal option, and limit internet purchases and merchant categories 8. Confirm order Contractually determined fees are displayed in the last step of the order form. The user who created the framework is documented in the order form. When creating a new framework, the entries can be saved as a draft for two days. If required, the draft can be edited further or deleted (action menu: 'Delete draft'). If you or AirPlus (on your behalf) order the first AirPlus Corporate Card framework as part of an agreement (product), you must first enter some details regarding the 'Purpose of card usage'. *For Type 3 cards, the process is shorter as less settings can be defined. ** No personal logo is possible for AirPlus Office Cards. ***These settings can be applied to all new cards under the framework or, in case of framework settings, to the existing and new cards under the framework.
06	What options are there for sending new AirPlus Corporate Cards to Card Users? When ordering an AirPlus Corporate Card framework, you may choose from the following shipping options: • Central shipment – Individual: Cards are shipped individually to a central address (only Type 1 and 2 cards) • Private shipment: Card Users determine what address their card is shipped to The selected option can be changed later in the framework settings.
07	Where can I see ordered AirPlus frameworks in the AirPlus Portal? You can view all your current frameworks under the Frameworks tab. There you can find your framework list with its respective product, framework name, framework number, and status. You can find the framework configuration (order form) available as a PDF under Details. You will be able to view the latest order form there, as well as its previous versions under 'History'.

08	Where can I see my framework fees?
	You can see your existing framework fees in the order form. Find your framework overview under the menu item Frameworks. Use the framework configuration function under Details to download the order form, including fees, as a PDF.
09	Can I make changes to the initial setup of an AirPlus framework?
	You can change most of the settings for your existing AirPlus framework in the Frameworks tab using the Edit function. Please note that every change will be inherited by all AirPlus Company Accounts below this framework. When changing card settings for AirPlus Corporate Cards at the framework level, the administrative user has to define whether the changes apply only to already existing AirPlus Cards or to all new cards under this framework too. If a change to a framework requires verification by AirPlus, such as in the case of a limit adjustment, the framework will be displayed as pending and it will not be possible to generate new cards during the approval phase. If you would like to view changed order forms, you can do so by viewing the Framework History. The descriptive name of a framework can be edited directly in the framework overview.
10	What is the credit limit displayed in the Portal?
	Find out more on displayed limits in the document 'Limit Display in the Portal' in the section Important documents.
11	How can I block a framework?
	If you wish to block a framework, please contact the AirPlus Service Team. A blocked framework is displayed in red for administrative portal users. Please note that cards cannot be generated as part of a blocked framework. You can still assign administrators to a blocked framework.
12	How can I terminate a framework?
	To terminate a framework, you can select the 'Cancel framework' item in the Frameworks tab behind a framework via the action item menu.

	Processing a framework cancellation takes 30 days. After this time, the framework cannot be used, and the cancellation cannot be reversed. Please note that all cards under the given framework will also be cancelled on the date of framework closure. Card Users will be informed about cancellation of their Corporate Card via e-mail. The terminated framework will disappear after 3 years.
13	How can I create a link to card applications for AirPlus Corporate Cards that I can integrate into my company intranet? To enable your employees to access card applications independently from your company intranet, generate a card application URL for an AirPlus Corporate Card framework from the Frameworks tab. To do this, please take the following steps: • Click on the relevant framework's 3-dot menu. • Enter a valid e-mail domain (e. g. @companyname.com) to receive a URL (e. g. https://www.airplus.com/examplelink) that you can share with cardholders via e-mail or on your intranet site. Please note that intranet links can only be created for frameworks that provide a default limit for all Card Users. If this is not the case, frameworks can be adjusted in the order form to set a limit and allow the creation of intranet links.
14	How can I terminate a product? For termination of an AirPlus product, please contact your AirPlus Service Team. Please note that a product must be cancelled with 30 days notice. The associated frameworks and cards remain active until the termination date. On the product cancellation date, the associated frameworks and cards are also irretrievably terminated.
15	How can I terminate my AirPlus agreement (AirPlus Subscriber Agreement)? For termination of your AirPlus Subscriber Agreement, please contact your AirPlus Service Team. Please note that your agreement must be terminated with 60 days notice in accordance with the AirPlus Subscriber Agreement Terms and Conditions. All active frameworks and cards will thereby also be terminated. However, your Portal users can still access the Portal for 12 months after termination.

Questions regarding transactions

01 When will my transactions be shown online?

You can view your transactions under the tab **Transactions** as soon as AirPlus receives the data regarding your transactions or charges from the respective supplier – usually within a few seconds (authorized transactions). Transactions are posted within two to seven days.

Fees are displayed separately from transactions on a separate subpage.

Goodwill bookings are displayed with a minus sign and have the transaction type 'OTHER_ITEM'.

02 What is the difference between an authorization and a transaction?

An **authorization** serves to rule out fraud and to check and reserve credit limit for intended sales. A purchase is first displayed as an authorization in the Portal.

A positive authorization becomes a **transaction** when the merchant sends the transaction to AirPlus. Only then will the available credit limit displayed in the Portal be reduced and effective for billing by posting to the framework.

03 How long can I look into my old transactions?

The AirPlus Portal gives you access to your transaction history without a limit. You may look into them, save a digital copy, or print them.

You can also download the transactions and authorizations in an excel file.

04 How can I dispute a transaction?

As an administrative user or Card User, you can easily submit a dispute about a transaction in the AirPlus Portal.

Go to **Transactions** and click on '**Start dispute**'. Select the transactions you wish to dispute to start the dispute request. Some of the dispute reasons might require you to contact the merchant in advance and upload appropriate documents.

You can select **up to 50 transactions** per dispute case. Please submit your dispute as soon as possible after the transaction has appeared on your statement. You can find the maximum dispute periods in the applicable GTC.

The **Disputes** tab allows administrative users to view the status of their own requested disputes.

The Card User can open an overview of disputed transactions on the top of the **Transactions** tab via the 'All disputes' link.

Administrative users can also dispute several transactions from different cards in one step.

Fees cannot be disputed online.

05 What is the exchange rate at AirPlus?

If you conduct a transaction in a different currency than your statement currency, AirPlus will apply the Mastercard® exchange rate on the date of transaction.

With the help of this currency calculator, you can view the difference between the exchange rate applied by AirPlus and the exchange rate of the European Central Bank: [Currency calculator | AirPlus](#)

06 When will CBTAF be charged?

The **Crossborder Transaction Fee (CBTAF)** is a fee charged by AirPlus for the cross-border use of a payment card as well as a virtual payment card (**Virtual Card**).

AirPlus will not charge CBTAF for cross-border payments between European Economic Area (EEA) countries if the payment order is denominated in EUR, SEK, or RON. This is in accordance with EU Regulation 924/2009, as amended by EU Regulation 2019/518 (**EU Pricing Regulation**), which applies to cross-border payments within the EEA.

For transactions where the payer is located in the EEA and the payee is located in a European country that is not part of the EEA but has adopted the Euro as its official means of payment, AirPlus will also not charge CBTAF as of April 15, 2021. This rule applies, for the time being, to Andorra, Monaco, San Marino, and Vatican City.

07 In which countries can my AirPlus payment method not be used?

With the 5th Money Laundering Directive, the European Commission has extended the criteria for payments in high-risk third countries.

In the **Important documents** > '**Product information**' section, you will find an up-to-date list of all high-risk countries.

In the security settings, when defining country exceptions, the countries that fall under the high-risk countries or countries with embargoes are additionally marked.

Questions regarding statements

01 Which payment related documents can I view in the AirPlus Portal?

In the AirPlus Portal, you can view and download **statements, statement summaries, reminder letters, and late payments**.

Depending on the agreement terms and product, the administrative roles as well as the Card User (Corporate Card) can retrieve the statement at card or framework level.

For AirPlus Corporate Cards Type 1 and 2, both the Card User as well as the administrative roles can view the documents.

02 Will I be informed automatically about new statements?

Yes, you will be informed via e-mail as soon as a new statement is available in the AirPlus Portal. You can configure the notifications via your profile menu.

03 For how long can I inquire into my old statements?

The AirPlus Portal gives you access to your current and historical statements. You may inquire into them, save a digital copy, or print them.

04 Can I download tax invoices for AirPlus services from the AirPlus Portal?

Under the **Statements** tab, you find tax invoices for AirPlus services for tax purposes only. These are marked as document type INVOICE and can be downloaded as a PDF.

05 Can I also download my statements in a bundle?

You can download the statements individually (download icon behind one of the statement lines) or as a ZIP file of all statements visible on the page with the download icon placed above the table.

06 Where can I see if the Card User (Corporate Card) has paid his statements?

As an administrative user, you can call up the most recent payment for a card for AirPlus Corporate Cards Type 2 on the start page (via the menu of the action button). You can also access the overview via the **Cards** tab.

To note:

The 'total payment amount' represents the payment amount that has been paid in. The 'payment amount' represents the portion credited to the respective selected card.

Questions regarding AirPlus Insurances

01 Where can I see which insurances I have signed up for?

As an administrative user, you can see which insurances are included in the agreement in the fee section of the order forms of a framework. The order forms are available in the **Frameworks** tab.

02 Where do I find information on insurance conditions?

AirPlus insurance conditions are available for download here: www.airplus.com/contracts-insurance/

03 Where do I find the Access Code for the Telemedicine Assistance Service?

Program Managers and Portal Administrators can find the Access Code for the Telemedicine Assistance Service in the order form of a framework. You can find the order form under the **Frameworks** tab. To access it, click on the '**Details**' action button. The code will be displayed in the lower area of the order form. The code is only available if your company signed an agreement with Insurance Package incl. Telemedicine Assistance Service. Furthermore, the code is displayed in the overview table during the new framework creation process.

Questions regarding AirPlus Electronic Billing

01 What is Electronic Billing?

AirPlus provides customers structured datasets for automated processing both daily (to be exported to travel expense systems) and at the time of invoicing (to be exported to financial accounting systems).

02 How can I request the delivery of Electronic Billing data in the AirPlus Portal?

Administrative users can activate Electronic Billing data deliveries when creating a new framework. This can be done either by adding the new framework to an existing Electronic Billing profile (Electronic Data Interchange (EDI) respective DTN number) or by creating a new Electronic Billing profile.

For Electronic Billing data delivery, you can define the billing data format and daily transaction data you would like to receive.

The selections are summarized below. If necessary, an additional entry such as a reference number must be entered.

If you request a new profile for Electronic Billing in the framework order form, the new DTN number will be displayed after in the Electronic Billing tab.

Previously ordered Electronic Billing data deliveries can be viewed or changed at any time in the order form in the **Frameworks** tab.

In the tab **Electronic Billing** as well as under 'Documents' you will find a '[Guide for AirPlus Electronic Billing](#)'.

03 What formats are available for downloading data?

Daily datasets (transaction data):

- ATX
- ATXplus
- CDF3
- DailyFlex

Datasets at the time of invoicing (statement data):

- CSV
- XML
- EDIFACT

	• LARS • ATXCollect • PDF (Please note: PDF does not support digital signature)
04 How long is data available in the Portal?	
	You have access to your current and historical files from the time they are uploaded to the AirPlus Portal. You can download the files individually or in bulk. Already downloaded files are marked with a gray download icon but can be downloaded multiple times.
05 How do I apply to have my data transmitted electronically from AirPlus?	
	During the framework ordering process, you determine the formats and transmission channels for Electronic Billing data. If you want to change the settings of your existing framework, you can do this accordingly by editing the order form.

Questions regarding AirPlus Company Account*

*Same processes are valid for AirPlus Debit Accounts or AirPlus Travel Trade Accounts.

01 What is an AirPlus Company Account?

An AirPlus Company Account is a lodged solution for paying and settling your business trips. The AirPlus Company Account is deposited with your travel agency, your inhouse travel department, in your online booking system or directly with the service provider. Travel is booked as usual. All costs for means of transport are automatically settled via your AirPlus Company Account.

02 Where can I view all my cards for AirPlus Company Accounts?

Administrative users can already see all AirPlus Company Accounts on the start page, filter and jump into certain functions.

Also, in the tab **Cards** the roles Program Manager, Portal Administrator and Card Administrator can see all AirPlus Company Accounts and details. The action button (icon with 3 dots) can be used to access further functions such as the settings.

03 How can I see my full number of an AirPlus Company Account?

Program Managers and Portal Administrators can use the **View number** icon on the start page for a selected AirPlus Company Account to open a PDF document containing the full number, the expiry date, the EDI partner number and additional information about the DBI setup.

04 What overviews are available to me for my AirPlus Company Account?

On the start page, an administrative user can quickly and purposefully access AirPlus Company Accounts, filter by various criteria, and jump into important functions for managing the cards.

Also, in the tab **Cards** the roles Program Manager, Portal Administrator and Card Administrator can see all AirPlus Company Accounts and details. The action button (icon with 3 dots) can be used to access further functions such as the settings.

05 How can I edit the settings of an AirPlus Company Account?

As an administrative user, you can open an overview of all AirPlus Company Accounts via the **Cards** tab (or alternatively via the home page). After selecting an active AirPlus Company Account, open the functions for viewing and changing the settings via the action button (3 dots).

If AirPlus changes the settings of an AirPlus Company Account, the Program Manager or Portal Administrator must approve the change.

06 How can I order a new AirPlus Company Account?

Program Managers and Portal Administrators can order new AirPlus Company Accounts. For this you have to configure the following settings:

1. General set-up

- Select a product and framework

2. Definition of a descriptive name

3. Configuration of the Descriptive Billing Information fields

- Field selection
- Field length (min/max)
- Format
- Name on statement
- Mandatory field yes/no

4. Definition of statement layout

5. Definition of payment terms

6. Display of the Electronic Billing configuration*

7. Definition of card limit

8. Confirmation of the order

AirPlus can also create a new AirPlus Company Account on your behalf. In this case, the Program Manager or Portal Administrator must approve the new card.

The Program Manager or Portal Administrator can see if any AirPlus Company Accounts are waiting for approval by clicking on the **'Approve'** box at the top right of the start page for the AirPlus Company Accounts. There they can view the details of the new card and approve or decline it.

When creating a new AirPlus Company Account, the entries can be saved as a **draft** for two days. If required, the draft can be edited further or deleted again via the **Cards** tab > Link **'Order forms & drafts'** > action menu: **'Edit'** or **'Delete'**).

* The Electronic Billing configuration is done on framework level.

07 How can I block an AirPlus Company Account?

Administrative users can **temporarily block** AirPlus Company Accounts in the AirPlus Portal under the tab **Cards** or directly on the home page. This process does not require any justification.

A temporarily block (called card lock) can be done via the following icon: 

08 Where can I find the statements/invoices for my AirPlus Company Accounts?

As an administrative user, you will find the statements, late payments and reminders in the **Statements** tab.

You can download the statements individually (download icon behind one of the statement lines), or as a collective download of all statements visible on the page with the download icon placed above the table.

09 Where can I view the transactions of my AirPlus Company Accounts?

As a Program Manager, Portal Administrator or Accountant, you can see your transactions in the **Transactions** tab.

The Descriptive Billing Information (DBI) and the statement number are also displayed for transactions. In addition, the AirPlus fees are displayed.

10 How can I enrich transactions with missing DBI?

The Card Administrator role as well as the Program Manager and Portal Administrator, can fill missing Descriptive Billing Information (DBI) of AirPlus Company Account¹ transactions.

The functionality can be entered via the tab **Transactions** and the sub-menu '**Transactions**'. The number of transactions whose mandatory DBI fields including the NR field have become conspicuous in the AirPlus processing procedures are shown in the box '**Transactions for review**'.

To update the DBI fields of the transactions, click on the button '**Enrich Transactions**'.

The transactions with missing DBI are displayed with the complete transaction details.

The following fields can be updated:

- All DBI fields – the DBI fields with missing data are marked with a red frame
- Travel Agency number (NR field)

Click the button '**Submit**' behind every transaction and confirm the changes.

¹ As well as AirPlus Debit Account and AirPlus Travel Trade transactions.

	An update of the transaction is possible as long as the transaction has not yet been settled.
11	Where can I find an overview of the changes being made to Electronic Billing as part of the Company Account Migration? Please visit our dedicated Electronic Billing webpage for more information and to check whether any adjustments are required on your part.
12	How can I terminate an AirPlus Company Account? Administrative users can terminate an AirPlus Company Account in the AirPlus Portal under the tab Cards: on the lower right corner the user will find a link named 'Payment instrument termination'. You have two options to terminate a card: • Earliest possible date (ordinary): in 30 days • Earliest possible date (extraordinary): in less than 30 days. Please state the reason for which an extraordinary termination date is desired. A terminated AirPlus Company Account will be displayed in red as 'Terminated'. Please note: • An AirPlus Company Account termination cannot be undone. • An AirPlus Company Account can be terminated 'ordinarily' for a future date of at least 30 days and max. 12 months in advance. • An AirPlus Company Account can be cancelled 'extraordinarily' immediately. The reason for termination must be stated. • A maximum of 30 AirPlus Company Accounts can be canceled in one step.
13	How can Descriptive Billing Information (DBI) in AirPlus Company Account transactions be corrected? Card Administrators, as well as Program Managers and Portal Administrators, can correct Descriptive Billing Information (DBI) of AirPlus Company Account transactions. You can do so in the box 'Transactions for Review' under the tab Transactions. This box shows the number of transactions with missing DBI. By clicking on the button 'Enrich Transactions' you will access a page which displays all transactions and transaction details and offers fields to fill the DBI input. The transfer to AirPlus is done transaction by transaction. After submitting it, the updated transaction will not be visible anymore in the 'Transactions for Review' box.

Questions regarding AirPlus Virtual Cards

01 What are AirPlus Virtual Cards?

AirPlus Virtual Cards are virtual Mastercard® cards equipped with a unique Mastercard number, an expiration date, and a card verification code (CVC). They are the digital version of a conventional plastic card. Users with rights to AirPlus Virtual Cards can **generate virtual card numbers for individual transactions** to pay for travel, procurement, or other expenses worldwide.

All expenses made with AirPlus Virtual Cards are **settled centrally** and are itemized on one clearly structured collective statement. Additional information and clear allocation of payments and bookings simplifies settling and analyzing costs.

02 What product versions of AirPlus Virtual Cards does AirPlus offer?

AirPlus offers three product versions of AirPlus Virtual Cards:

AirPlus Virtual Cards Classic: The classic version is an optimized product version for corporate customers making the traditional business travel purchases with which they are familiar.

AirPlus Virtual Cards Travel Trade: This version is specifically designed for travel agencies and tour operators needing a flexible virtual payment solution to handle their own travel-related services.

AirPlus Virtual Cards Procurement: This is the ideal solution for B2B purchases and paying for purchased services such as office supplies, licenses, and certificates.

03 Differentiation of AirPlus Virtual Cards Single-Use and Multi-Use

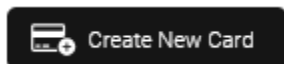

With AirPlus Virtual Cards Classic and Procurement, you can differentiate between Single-Use and Multi-Use variants. Your company determines whether a product contains Single-Use, Multi-Use, or both when establishing the agreement.

Single-Use means that only one transaction will be made with that card.

Multi-Use means that recurring transactions will be made within a specific merchant category for a 12-month period. This is useful if, for example, the same card has to be charged several times for one purpose, such as when purchasing software licenses that have to be paid for monthly.

04 How can I generate new AirPlus Virtual Cards?

Users with rights to AirPlus Virtual Cards can generate AirPlus Virtual Cards in the new AirPlus Portal under **Cards** or directly on the start page by clicking on the icon '**Create Virtual Card**':

During the **card generation process** you will first be asked for the payment category. Then you will provide relevant card and billing information and define settings such as merchant name, validity period, currency, and limit. Once confirmed, the new virtual card is immediately available and can be downloaded as a PDF.

Find a detailed description of the generation process in our video tutorial.

Overview of steps to generate AirPlus Virtual Cards:

- Select a framework
- Select a merchant category
- Specify card and billing information
- Define card settings
- Select 3D Secure profile (only for Multi-Use)
- Confirm

Further options on the confirmation page:

- View or download PDF of the generated card*
- The card number (PAN) can be saved via a button and inserted into other documents if required.

Differences in the creation of Single-Use or Multi-Use cards:

- An administrative user can create **Single-Use cards** for themselves as well as for other travelers/users.
- An administrative user can create **Multi-Use cards** only for themselves.
- If an administrative user (here Program Manager or Portal Administrator) wants to give another user the right to generate Multi-Use cards for themselves, they can assign the **Card User** (Virtual Cards) role to the user from the User Management tab. In this case, the user is assigned a budget** for card creation, a timeframe in which the budget can be used as well as permissible merchant categories.
- A Card User (Virtual Cards) who has other roles must change their role view in their profile menu using the Change Portal View function.
- When using the Multi-Use version of AirPlus Virtual Cards, the Card User's 3D Secure profile is required to use the card.

* The budget must be below the framework limit. It will be displayed accordingly.

** You should download the PDF and save it in a safe place so that the card data cannot be used by any unauthorized person.

05 For what transaction types can I generate AirPlus Virtual Cards?

Users of **AirPlus Virtual Cards Classic** and **AirPlus Virtual Cards Travel Trade** can choose from the following transaction types:

- Hotel
- Flight
- Car Rental
- Train
- Restaurant
- Other

AirPlus Virtual Cards Procurement offers only one transaction type (usable for e. g. parking fee, procurement, retail or telecommunication).

06 How do merchant category codes limit AirPlus Virtual Cards usage?

The merchant category you select when generating a card determines the purpose for which it can be used. This is because AirPlus checks every transaction to see whether the relevant service provider matches the merchant category chosen. If it does not match, the transaction will be declined.

Example: If 'flight' is chosen when a card is generated but the incoming transaction is from a hotel, AirPlus will decline the transaction to prevent potential abuse.

07 What control options are available to restrict the use of AirPlus Virtual Cards?

The control options available during the card generation process make it possible to restrict each virtual card to the specific purpose and period of use intended for each case.

The following control options are available, e. g. for the merchant category hotel:

- Name on card
- Name of hotel (only hotel)
- Length of stay (only hotel)
- Merchant name (mandatory)
- Validity period (mandatory)

	• Available limit (mandatory) • Card designation (optional) • Sales currency (optional)
08 How can I block a generated AirPlus Virtual Card?	
	Users with rights to AirPlus Virtual Cards can permanently block generated AirPlus Virtual Cards in the AirPlus Portal under the Cards tab or directly on the start page. You can block cards without needing to input a reason for it.
09 When do I need a 3D Secure profile for an AirPlus Virtual Card?	
	For AirPlus Virtual Cards in the Multi-Use version, a 3D Secure profile is required for security reasons. When generating one, therefore, you will need to create a 3D Secure profile or select one already available: 1. If no 3D Secure profile is available yet, you will be asked to create one. Once you have selected the product/framework and merchant category and entered card details and settings, you will then enter the following details for a 3D Secure profile: • Authentication type (biometric app or TAN via SMS: one-time password via text message) • Mobile phone number to receive text message • Security question (from a given list) and secret answer 2. If you have already created one or more 3D Secure profiles, they will all be displayed, with new cards assigned to the default profile unless you select otherwise. You can always change the assigned 3D Secure profile from your personal profile at a later time.
10 How do I create a 3D Secure profile for my AirPlus Virtual Card Multi-Use?	
	You can find the 3D Secure profiles section at the top of the page on your personal profile. Create a profile by • selecting the authentication type: one-time password (TAN) via SMS (text message) or biometric app • provide a mobile phone number • enter a security question and answer Each profile can have a descriptive name. One or more cards can be assigned to a profile. If one or more profiles already exist, they can be viewed and edited at any time, either by clicking on the Security Settings icon at the top right of the home page or from the personal profile in the 3D Secure profile submenu.

11	How can I increase the budget for a Card User (Virtual Cards)?
	As Program Manager or Portal Administrator, you can increase or renew the budget for the creation of AirPlus Virtual Cards for a Card User (Virtual Cards) from the User Management tab. Please note that the budget must be within the framework limit.

Questions regarding AirPlus Corporate Cards

01 In what countries are AirPlus Corporate Cards available in the new AirPlus Portal?

AirPlus offers AirPlus Corporate Cards in the following countries: Austria, Belgium, Bulgaria, Czech Republic, France, Germany, Hungary, Italy, Luxembourg, Netherlands, Poland, Romania, Slovakia, Switzerland and the United Kingdom.

02 What is an AirPlus Corporate Card type 1, 2, or 3?

AirPlus Corporate Cards are Mastercard® credit cards for business expenses, such as during a business trip.

There are three types that differ in terms of liability and whose bank account is used for settlement:

- **Type 1:** Company liability + settlement via company bank account
- **Type 2:** Company liability + settlement via private bank account (with later settlement via travel expense report)
- **Type 3:** Private liability (by the Card User) + settlement via private bank account (with later settlement via travel expense report)

Please note: To apply for an AirPlus Corporate Card Type 3, the Card User must be a resident of the country of the assigned agreement.

03 AirPlus Office Card

The **AirPlus Office Card** is a version of the AirPlus Corporate Cards created specifically for your business expenses. The card enables you to cover all business expenses such as office supplies, catering, and everyday costs as well as larger corporate expenses such as marketing costs and events.

This card is functionally comparable to an AirPlus Corporate Card Type 1, with equivalent online services. The AirPlus Office Card is personal.

04 AirPlus Private Card

The **AirPlus Private Card** is a Mastercard® credit card for your private expenses. This product is only available in Germany.

Functionally, the AirPlus Private Card is equivalent to an AirPlus Corporate Card Type 3. The same online services are available to you.

05	What can I do if I have not received the AirPlus Corporate Card / AirPlus Office Card I ordered?
	If you have not received your AirPlus Corporate Card / AirPlus Office Card within 5 days of ordering, please block the card immediately or contact your AirPlus Service Team. You will find the action icon Card Services below the card display. Please select 'Plastic Card Issues' followed by 'I have not received my card' as the reason for blocking it. The card will be blocked immediately. This block cannot be revoked. We will send you a new card within the next few days.
06	Where can I find and edit my PIN?
	Card Users (Corporate Card) can see the PINs for their AirPlus Corporate Card / AirPlus Office Card online by clicking on the icon  'View Card PIN' directly on the start page in the top right corner of the card view. For security reasons, you will enter a one-time password (TAN) sent to you via SMS (text message). The PIN can be changed by clicking on in the 'Card Services' drop-down menu below the card image: the Card User can change the existing PIN to the preferred digits by selecting Change Card PIN  . After the change, the new PIN is immediately active in our system and is usually accepted for contact-based card use (CHIP & PIN at the merchant or ATM). For this reason, we recommend that you insert your card into the payment terminal for the first transaction after the PIN change and do not use contactless payment. For more Information, please read here: https://www.airplus.com/media/pdf/pin/en-instruction-change-and-view-of-your-card-pin.pdf
07	How can I change a card's supplementary data / Descriptive Billing Information (DBIs)?
	Administrative users can adapt AirPlus Corporate Card supplementary data such as ID numbers and cost centers. Update this information under Settings. Card Users (Corporate Card) can find supplementary data in their security settings and can change it.
08	How can I block an AirPlus Corporate Card / AirPlus Office Card / AirPlus Private Card?
	You have the option to block a card from making payments either temporarily using 'Lock (temp.)' or permanently. Administrative roles and designated Card Users (Corporate Card) can block cards.

Temporarily lock card:

The 'Lock (temp.)' function  is used to temporarily lock a card from payment use.

- As a Card User, you can use the **lock** icon in the upper area next to your card display to temporarily lock the card and unlock it again at any time.
- As an Administrative User you can use the lock icon in the **Cards** tab (or on the home page) behind a card to temporarily lock the card and unlock it again at any time. This may be necessary, for example, in the event of a travel policy violation or if an employee should not use the card for a certain period of time.

The card will then be displayed with a closed lock.

Please note: If an Administrative User temporarily blocks a card, a Card User cannot unlock it.

Block card permanently:

- In case the Card User has not received their new plastic card or the card is defective, they will find a link reading **Card services** > 'Plastic card issues' under the card display that can be used to inform AirPlus about an issue with the plastic card, e. g. that they have not received the card.
- If a Card User wants to block the card because it has been lost or stolen, they can also click the **Card services** > 'Block card' link under the card display to block the card and request a replacement card.
- An administrative user will find the analogous menu items under the **Cards** tab or on the start page. (Please note: An administrative user is not permitted to block an AirPlus Corporate Card Type 3.)

A permanently blocked card is displayed in red.

Depending on the reason for blocking, **permanently blocking a card is irrevocable and not temporary:**

- Card not received → Permanently blocked, replacement card can be provided within a few days
- Card is defective → Card remains active, a new card will be provided within a few days
- Card lost → Permanently blocked, new card will be provided within a few days
- Card stolen → Permanently blocked, new card will be provided within a few days

09 What card settings can I define?

To make your AirPlus Corporate Card as secure as possible, you can restrict its use.

The following restrictions are available under **Settings**:

- **Transaction limit:** Define a maximum transaction amount
- **Number of transactions:** Define the maximum number of transactions per day (velocity).
- **Regions/Countries:** Define regions/countries where the card should not be used

	• Merchant categories: Define merchant categories in which the card can be accepted • Cash withdrawal: Define a daily and weekly limit • Online purchases: Define a daily online payment limit • Use of 3D Secure: See if 3D Secure is activated and change your 3D Secure profile from your personal profile • Limit: Temporarily or permanently adjust the spend limit you set at initial order • Bank details: All Card Users (Corporate Card) can change their bank details • Descriptive Billing Information (DBIs): View and edit your supplementary data. For AirPlus Corporate Card Type 3, administrative users can only edit DBIs.
10	Can card use be limited by merchant category? Yes, for AirPlus Corporate Cards Type 1 and 2 as well as for AirPlus Office Cards, administrative users and Card Users (Corporate Card) can block payments to certain merchant categories. Up to eight categories can be selected and blocked under Settings. Card Users cannot remove blocks to merchant categories set by administrative users. They can, however, block further categories. Please note that only Card Users can set restrictions for Corporate Cards in Type 3.
11	How do I create a 3D Secure profile for my card? A 3D Secure profile is required for online purchases. You can find the 3D Secure profiles section at the top of the page on your personal profile. Create a profile by • selecting the authentication type: one-time password (TAN) via SMS (text message) or biometric app • provide a mobile phone number • enter a security question and answer Each profile can have a descriptive name. One or more cards can be assigned to a profile. If one or more profiles already exist, they can be viewed and edited at any time, either by clicking on the Settings icon at the top right of the home page or from the personal profile in the 3D Secure profile submenu. If you change your phone number, please confirm with a one-time password (TAN). Please make sure that the number is in the correct format: +44 123 456 789. If you would like to change your number or add a second one, please go to Profile settings > My Personal Details. You can see if 3D Secure is activated in your security settings.

12	What do I have to consider if I change the limit for my AirPlus Corporate Card Type 3? If you are a Card User of an AirPlus Corporate Card with private liability (Type 3) and request a limit increase in the Portal, AirPlus will carry out a credit assessment and check the financial situation. It is possible that you are granted a smaller limit increase than you requested. In this case, you will receive a message that the total limit of the card has only been partially increased. You can view the total limit as well as the limit still available in the respective accounting period (open-to-buy) at any time on the start page in the Portal. Please note that administrative users cannot view or change limits for AirPlus Corporate Cards in Type 3.
13	Why can't I withdraw cash from an ATM with my AirPlus Corporate Card? If you can't withdraw cash from an ATM, you or your company may have blocked it in the Settings (depending on the card type). Otherwise, you may have reached your available cash or card limit. You can view these settings along with daily and weekly limits at any time in the security settings. This function is not available for Corporate Cards Type 2 issued in the UK.
14	What can I do in an emergency if I do not have enough limit on my AirPlus Corporate Card? In emergency situations, Card Users can apply for VIP status on an AirPlus Corporate Card through their AirPlus Service Team if the limit on their card is insufficient. With VIP status, all card restrictions are lifted for a certain period of time. If the Card User wishes to change card settings during this phase, a message will be displayed to them when the settings restricting card use (e. g. turnover limit) are changed, stating that they cannot access these card settings while in VIP status. However, the bank connection data can be adjusted even with VIP status. This VIP function is also available for AirPlus Virtual Cards.
15	I am on a business trip and urgently need a replacement card. What do I need to do? It is possible to initiate a replacement card via self-service in the Portal. Please go to Card services (under your card image) and select 'Plastic card issues' for the reason 'card is defective' or 'Block card' for the reasons 'Card lost or stolen'. The process of card replacement is automatic.

	With Mobile Payment you can continue using your card via Apple Pay or Google Pay after only a few minutes. For this please log in your AirPlus Mobile App, as soon as the card is available you can start the provisioning to your mobile wallet. In the AirPlus Mobile App you can also find all card details (eye symbol) that are needed for online payments if you do not have your plastic card at hand.
16	How can I pay my AirPlus Corporate Card statement? The payment methods offered for settling a statement depend on the country where the card is issued. Direct debit is available in all countries (authorization required). Special conditions pertain outside the SEPA mandate area (the UK, Switzerland) and for Poland: • Non-SEPA: Bank transfer, non-SEPA direct debit (valid authorization required), and debit card payment; please note that for debit card payments the 3D Secure procedure of your card-issuing bank is used • Poland: Bank transfer For AirPlus Corporate Cards in the UK, you will find a detailed description of the various payment options in the help section in the Explanatory Document Payment of AirPlus Corporate Card Statements. An online form for applying for direct debit (SEPA / Direct Debit) can be accessed in the card settings.
17	Where can I see my statement payments already made? As a Card User (Corporate Card), you can see your most recent payment for your AirPlus Corporate Cards Type 2 and 3 and your AirPlus Private Card in a box on the right-hand side of the start page. The button View all payments will take you to an overview of all payments. An administrative user (Program Manager and Portal Administrator) can also view statement payments for AirPlus Corporate Cards Type 2. They get access from the Cards tab via the 'View payments' action menu. To note: Total Payment Amount represents the total amount that has been paid in, and the Payment Amount is the allocated amount to the particular card you are viewing.
18	Can I earn Miles & More with my AirPlus Corporate Card or AirPlus Private Card? If you have a German AirPlus Corporate Card, you may benefit from the Miles & More loyalty program. Your agreement specifies whether you may earn miles. Card Users can decide whether they wish to participate (subject to a fee). The application is made by navigating from the Important Documents to the Additional Benefits > Miles & More section. The Miles & More number must be entered here. Miles & More is available for active AirPlus Corporate Cards Type 1, 2, and 3, but not for AirPlus Private Cards and AirPlus Office Cards.

	Using the AirPlus Corporate Card with Miles & More credits one mile per euro. Cash withdrawals are excluded. The service can also be canceled via the same access. Or you can edit your Miles & More number. In case the service is not displayed to you, your company has chosen not to offer this service to card users.
19	Where can I find AirPlus Corporate Card Service Guides? You can find Service Guides for your AirPlus Corporate Cards in the Important Documents > Help section or directly at the following links: - AirPlus Corporate Card Type 1, 2, 3: https://www.airplus.com/world/en/airplus/service-guide/corporate-card.html - AirPlus Office Card: https://www.airplus.com/world/en/airplus/service-guide/office-card.html - AirPlus Private Card: https://www.airplus.com/world/en/airplus/service-guide/private-card.html
20	How will my new card be delivered to me? New AirPlus Corporate Cards will be shipped to your company or private address depending on what your Program Manager defined during the order process. Replacement cards can also be mailed when permitted. Corresponding costs will be displayed on Card Users' application forms.
21	As an administrative user, how can I see the status of an AirPlus Corporate Card application? As an administrative user, you will find the link to the Status Card Applications overview under the Cards tab. Here you can search for a Card User (Corporate Card) or filter by status. The following statuses are available: - Approved - Card application with Card User In progress - In process with AirPlus - Rejected (the card application was rejected) - Expired (a card application expires after 30 days) - Pending approval

22	Which card settings are available to administrative users for the different AirPlus Corporate Card types?
	For AirPlus Corporate Cards Type 1 and 2: • Transaction limit per day • Number of transactions per day • Regions/countries • Cash withdrawal • Restrictions for online transactions • Card limit • Merchant categories • Descriptive Billing Information (DBI) For AirPlus Corporate Cards Type 3: • Descriptive Billing Information (DBI)
23	Where can I apply for additional service packages for my AirPlus Corporate Cards?
	Under Additional Benefits in the Important Documents section, you can request an AirPlus Travel 1 Package for a fee as a Card User with an AirPlus Corporate Card Type 1, 2, or 3 (not for AirPlus Private Card and AirPlus Office Card) - provided that your company has included this package in the agreement. Only available for active cards. The AirPlus Travel 1 Package includes AirPlus Travel Comfort insurance and a Concierge service. The service can also be deselected again via the same access. (The deselection of a Third Party Service is one month' notice to the next anniversary of the 'Activation Date'. In case the service is not displayed to you, your company has chosen not to offer this service to card users.
24	Where can I find information about the Value Added Services for my AirPlus Corporate Cards?
	As a Card User (Corporate Cards) you find more information about the • Concierge Service • HRS Hotel Portal • Priority Pass • Lounge Pass via the Important documents section.

25 AirPlus Corporate Card termination

Administrative users can initiate the termination of one or more AirPlus Corporate Cards Type 1, 2, 3 or AirPlus Office Card online:

To do so, go to the **Cards** tab. You can find the link **Terminate Payment Instrument** in the lower right corner. When clicked, you can select and terminate the corresponding cards.

A canceled card will be displayed in red as 'Terminated'.

The Card User will receive an information e-mail. However, they can still log into his Portal to access statements.

Administrative users may only inform AirPlus that the basis for using the AirPlus Corporate Card Type 3 ceased. AirPlus will then terminate the card with a notice period of 60 days.

Card Users (Corporate Card) can also terminate their AirPlus Corporate Cards Type 3 or Private Cards. To do so, go to the **Card Services** link under the card image and select '**Terminate Payment Instrument**'.

Please note:

- The card termination cannot be undone.
- According to the agreement between AirPlus and Card User, AirPlus Corporate Cards Type 3 and AirPlus Private Card can only be terminated by Card User for a future date of at least 30 days and max. 12 months in advance.
- AirPlus Corporate Cards Type 1 and 2 can be terminated immediately.
- Administrative users can initiate the termination of an AirPlus Corporate Cards Type 3 for a future date of at least 60 days. A maximum of 30 cards can be terminated in one step.
- Permanently blocked cards or cards in VIP status cannot be terminated.
- AirPlus Corporate Cards and AirPlus Private Cards are linked to the employer's agreement with AirPlus, which allowed them to benefit from third party services agreement, such as Miles & More, Travel 1 Package etc. Completing the termination of AirPlus Corporate Cards means that Card Users are no longer entitled to use third party services. Hence, third party services will be removed also from the AirPlus Private Card.

Questions regarding Reporting

01 Which reports are available to administrative users?

Reports are available for Program Managers and Portal Administrators. They can be found under the **Reports** tab.

- Card lists for your AirPlus Corporate Cards
- Card/Account lists for Lodged products
- Framework Lists for Lodged Products, Virtual Cards and Corporate Cards
- Delinquency Reports for AirPlus Corporate Cards Type 1 and 2

02 Overview of all AirPlus Corporate Cards for my company

Under the **Reports** tab, you will find lists that you can download as Excel or CSV files for AirPlus Corporate Card product.

Two options are available:

- Card lists with complete card numbers
 - Available only to Program Managers
 - Requires TAN confirmation
- Card lists with masked card numbers

You can filter the list by preference and select what information to display, e. g. framework details. Additional service packages such as Lufthansa Miles and More or AirPlus Travel 1 Package can also be seen here in the list.

No limit information is displayed for AirPlus Corporate Cards Type 3.

A card list that has already been downloaded is then available at the top of the screen for 24 hours for renewed downloads.

03 Overview of all AirPlus Company Accounts, AirPlus Debit Accounts and AirPlus Travel Trade Accounts for my company

Under the **Reports** tab, you will find lists that you can download as Excel or CSV files for AirPlus Lodged Accounts.

Two options are available:

- Card/Account lists with complete card numbers
 - Requires TAN confirmation
- Card/Account lists with masked card numbers

	You can filter the list by preference and select what information to display, e. g. framework details. A generated card/Account list is displayed at the top of the screen for 24 hours to download.
04	Overview of all Frameworks for the products AirPlus Company Account, AirPlus Virtual Cards and AirPlus Corporate Cards Under the Reports tab, you will find lists that you can download as Excel or CSV files. Please select the according product category. You can filter the list by preference and select what information to display, e. g. DBI set-up. A generated Framework list is displayed at the top of the screen for 24 hours to download.
05	How can I see if Card Users have paid their AirPlus Corporate Card statements? Delinquency Reports are available for administrative users (Program Managers, Portal Administrators and Card Administrators) of an AirPlus Corporate Card program. This shows which Card Users are in arrears with the payment of their AirPlus Corporate Card statement. The reports can be found under the Reports tab.
06	What is AirPlus Intelligence? AirPlus Intelligence is a B2B reporting platform that allows you to analyze your business spend. The platform is designed in a modular approach: At the heart of the platform is the AirPlus Intelligence Hub, which serves as a home page. The hub shows authorized users the most important numbers about their volumes as KPIs and visualizations through a dashboard design. AirPlus Intelligence Data+ is a customizable data download and automated data delivery with which you can generate customized data reports across all agreements. Further modules to come soon. You find the access to AirPlus Intelligence under your Profile.
07	Which user roles can have access to the AirPlus Intelligence platform? The roles Program Manager, Portal Administrator and Intelligence User will have access to the AirPlus Intelligence Hub for free. Further AirPlus Intelligence premium modules can additionally be assigned to the user.

You find the access to AirPlus Intelligence under your **Profile**.

08 Which data can the user access in AirPlus Intelligence?

Rights are defined for every user and user role. The user role is assigned on the level of the agreement, the product or the framework. The rights assigned to the user in the Portal and the reporting platform AirPlus Intelligence can differ.

For example: a user can have a 'Portal Administrator' role with rights on agreement A. As a Portal Administrator, this user will have administrative rights on this agreement in the Portal and will also be able to see reports for agreement A in AirPlus Intelligence.

Another user who has an 'Intelligence User' role on the agreement A, will only be able to see reports, but will have no rights in the Portal.

Users who don't have a user role Program Manager, Portal Administrator or Intelligence User will not have access to the AirPlus Intelligence reporting platform.

By default, the role Intelligence User only sees anonymized data in AirPlus Intelligence.

Questions regarding roles for Travel Agencies

01 What are the roles for travel agencies using an AirPlus product?

For a travel agency using AirPlus products such as AirPlus Virtual Cards, Travel Agencies have the same roles as companies:

- Program Manager
- Portal Administrator
- Card Administrator
- Accountant
- Electronic Billing User

(Role descriptions see above.)

02 What are the roles for Travel Agencies working on behalf of a company?

The following roles are provided for a travel agency that performs tasks on behalf of a company:

- Program Manager (Travel Agency)
- Portal Administrator (Travel Agency)
- Card Administrator (Travel Agency)
- Data Quality Administrator (Travel Agency)
- Upload Manager (Travel Agency)
- Intelligence User (assignment by corporate customer)

Travel Agencies can **generate virtual cards on behalf** of a company for its employees. In this case, for example, you will be assigned the role of 'Program Manager (Travel Agency)' for one or more corporate customers. The role is assigned by AirPlus Customer Service.

The portal content looks different for these travel agencies, as they do not have an agreement with AirPlus, for example. They see neither the agreements of the customers they work for nor their frameworks. They must be given framework numbers by the corporate customer in order to generate virtual cards.

Descriptive Billing Information (DBI) can also be updated for AirPlus Company Account transactions of your corporate customers, provided that your IATA number is stored in the transactions.

03 The Program Manager (Travel Agency) role

The **Program Manager (Travel Agency)** is the first user of a travel agency (the primary contact person), who has been set up for the Portal by AirPlus.

This role is used to define the user structure of the travel agency in the Portal, e. g. different Portal Administrators (Travel Agency) can be created.

	This person receives authorizations on frameworks from a company in order to take over Portal functions on behalf of the corporate customer.
04 The Portal Administrator (Travel Agency) role	
	The Portal Administrator (Travel Agency) role has extensive user rights in the Portal (second highest functional level in the travel agency). This role can access either all or only specific products or frameworks in its legal entity. This role manages all other user levels: new user creation, deactivation and deletion, and card program assignment. Rights include: • Creating/deactivating other Portal Administrators (Travel Agency) and Card Administrators (Travel Agency) within their travel agency • Generating AirPlus Virtual Cards • Viewing all cards generated by their travel agency • Viewing all AirPlus Virtual Cards authorizations and transactions at card level • Enriching Descriptive Billing Information (DBI)
05 The Card Administrator (Travel Agency) role	
	The Card Administrator (Travel Agency) role acts on a company's behalf. Rights on behalf of another company include: • Creating AirPlus Virtual Cards for employees of a company for which the travel agency is contracted • Viewing the Virtual Cards created in the travel agency • Viewing the transactions and authorizations of the Virtual Cards created in the travel agency • Viewing and changing the security settings of the Virtual Cards created in the travel agency • Blocking cards
06 The Upload Manager (Travel Agency) role	
	The Upload Manager (Travel Agency) is assigned by the Program Manager (Travel Agency) or Portal Administrator (Travel Agency) and only available for travel agencies or merchants. This role is enabled to upload EDITA or TAMARA files (TAMARA EN, MA, BSP) to AirPlus.
07 The Data Quality Administrator (Travel Agency) role	
	The Data Quality Administrator (Travel Agency) is assigned by the Program Manager (Travel Agency). With his permission he is able to enrich transactions of the corporates AirPlus Company Accounts with missing Descriptive Billing Information (DBI).

	This role can be limited in rights on agreement, framework and Merchant ID level.
08	The Intelligence User role
	The Intelligence User is assigned by the corporate for which the travel agency is working on behalf. With his permission he is able to access the Intelligence Hub and (if applicable) further AirPlus Intelligence premium modules for creating reports on the corporates card program.
09	What is an AirPlus Travel Trade Account?
	The AirPlus Travel Trade Account is a central payment method tailored to the travel industry for statements you receive from your service providers. The AirPlus Travel Trade Account can be used to pay for travel services from low-cost carriers, rail, hotels and other service providers. Instead of many individual receipts, you receive only one clear collective statement with the additional data selected by you. This reduces your administrative effort, improves your payment flow and minimizes your personal risk.
10	Where can I view all my cards?
	Administrative users can already see all cards on the start page, filter and jump into certain functions. Also, in the tab Cards the roles Program Manager, Portal Administrator and Card Administrator can see all AirPlus Travel Trade Accounts and details. The action button (icon with 3 dots) can be used to access further functions such as the framework settings.
11	How can I see my full card number of an AirPlus Travel Trade Account?
	Users with the Program Manager or Portal Administrator role can use the View number icon on the start page for a selected AirPlus Travel Trade Account to open a PDF document containing the full card number, the expiry date, the EDI partner number and additional information about the DBI setup.
12	How can I edit the settings of an AirPlus Travel Trade Account?
	As an administrative user, you can open an overview of all AirPlus Travel Trade Accounts via the Cards tab and, after selecting a Travel Trade Account, open the functions for viewing and changing the settings via the action button (3 dots). If AirPlus changes the settings of a card, the Program Manager or Portal Administrator must approve the change.

13 How can I create a new AirPlus Travel Trade Account?

The Program Manager and Portal Administrator roles can generate new cards for AirPlus Travel Trade Accounts.

For this you have to configure the following settings:

1. General set-up:

- Select the product and a framework

2. Definition of a descriptive name

3. Configuration of the Descriptive Billing Information fields

- Field selection
- Field length (min/max)
- Format
- Name on statement
- Mandatory field yes/no

4. Definition of statement layout

5. Definition payment terms

6. Definition of Electronic Billing set-up

7. Definition of card limit

During card generation, all criteria are configured and either a new framework is automatically generated for the new card or the option to assign it to an existing framework is offered.

AirPlus can also create a new AirPlus Travel Trade Account on your behalf. In this case, the Program Manager or Portal Administrator must approve the new card.

To do this, the Program Manager or Portal Administrator sees on the start page for the AirPlus Travel Trade Accounts in the box at the top right **Approve** that cards are waiting for approval. By clicking on the box, the user sees all cards that need to be approved. He can view the details of the new card and approve or decline.

14 How can I block an AirPlus Travel Trade Account?

Administrative users can **temporarily** block AirPlus Travel Trade Accounts in the AirPlus Portal under the tab **Cards** or directly on the start page. This process does not require any justification. The card will then be displayed in red.

To block a card **permanently**, please contact the AirPlus service team.

15	Where can I find the statements/invoices for my AirPlus Travel Trade Accounts? As an administrative user, you will find the statements, late payments and reminders in the Statements tab. You can download statements individually (download icon behind a statement line) or as a collective download of all statements visible on the page with the download icon placed above the table.
16	Where can I view the transactions of my AirPlus Travel Trade Accounts? As a Program Manager, Portal Administrator or Accountant, you can see both authorizations and transactions in the Transactions tab. The Descriptive Billing Information (DBI) and the statement number are also displayed for the transactions. In addition, the AirPlus fees are displayed.
17	Where can I find an overview of the changes being made to Electronic Billing as part of the Travel Trade Account Migration? Please visit our dedicated Electronic Billing webpage for more information and to check whether any adjustments are required on your part.
18	How can I enrich my customers' transactions with Descriptive Billing Information (DBI)? As travel agency you can enrich transactions with regard to missing Descriptive Billing Information (DBI) of the AirPlus Company Accounts of your corporate customers. The dedicated roles like Data Quality Administrator, Program Manager and Portal Administrator have an overview of all transactions of their customers, provided that the transactions include your IATA number. • Enter the tab Data Quality System: All transactions whose mandatory DBI fields including the Travel Agency number (NR field) have become conspicuous in the AirPlus processing procedures are shown according to your IATA number. • Use the sorting function in the headings to search for specific transactions. • Open the transaction detail view (purple arrow) to view the DBI fields. • Update the DBI fields. • Click on the Enrich button and confirm the changes. The transfer to AirPlus may take a little time. You can see the status indicated by the orange dot on the overview page. An update of the transaction is possible as long as the transaction has not yet been settled.

19	How can I upload transaction data files to AirPlus?
	As a travel agency you are enabled to upload transaction files to AirPlus via the Portal. This can be, TAMARA (EN, MA, BSP) or EDITA files. The special Upload Manager role has to be assigned for this. (Please note, the function is only available to this role. Program Manager and Portal Administrator do not have access to this function themselves.) Process to upload files: • The user with the Upload Manager role logs in and gets a specific page 'File Upload Management' and a button Upload file. • He can only upload files in predefined formats. The possible formats are displayed to him. • A file selector allows the user to choose a file from his PC file system and upload it. • The uploaded file is then displayed in an overview with its status. Please note: • The files must not exceed a maximum size of 50 MB. • The overview of uploaded files is limited to the last 14 days. • In case a user gets the Upload Manager role on top of another role, he needs to 'switch the role' to work as Upload Manager.
20	As a Program Manager (Travel Agency) working on behalf of a corporate client, do I have the same User Management?
	As a Program Manager (Travel Agency) and Portal Administrator (Travel Agency), you will see a simplified User Management. This means that you do not have the sub-tab External Users.
