

AirPlus Lodged Products: Enrich transactions as a corporate customer

AirPlus

Enrich the transaction data of an AirPlus Account

Companies with Lodged Products* and their partners, such as merchants, can enrich transactions with missing Descriptive Billing Information (DBI / reference fields).

The prerequisite is that a DBI Loop is set on the Accounts.

3 easy steps:

1	Overview of transactions for review
2	Entering missing DBI (reference fields)
3	Submitting updated transactions

Roles for enriching transactions (DBI / reference fields)

Program
Manager

This role always has access to all functions with full permissions.

Portal
Administrator

This role can access the 'Enrich Transactions' function.
If necessary, authorizations can be restricted.

Card
Administrator

This role has access to the 'Enrich Transactions' function at the operational level. Permissions can be restricted.

Step 1: Overview of transactions for review

Program Managers, Portal Administrators and Card Administrators can add missing Descriptive Billing Information (DBI) to transactions. You can access this functionality here:

1. Transactions tab
2. Choose a product
3. Go to submenu Transactions
4. If any mandatory DBI fields are missing, you can add them here. Click on **Enhance Transactions**.

The screenshot displays the AirPlus Portal interface. The top navigation bar includes the AirPlus logo, a 'Portal' label, and a list of menu items: Transactions, Statements, Electronic Billing, User Management, Frameworks, Disputes, and Reports. The 'Transactions' tab is highlighted with a green box and the number 1. Below the navigation bar, the 'Transactions' section is visible, with 'Lodged Products' selected under the 'Corporate Cards' and 'Virtual' categories, highlighted with a green box and the number 2. The main content area shows a summary for 'Marketing - Communications' with a 98% status, available balance of 51,977.24 EUR, and a limit of 53,000.00 EUR. A green box with the number 4 highlights the 'TRANSACTIONS FOR REVIEW' section, which shows 1 transaction and an 'Enhance Transactions' button. Below this, a green box with the number 3 highlights the 'Transactions' submenu. The bottom part of the screen shows a table of transactions with columns: Traveller Name, Merchant Name, Transaction Type, Service Description, Exchange Rate, and Settled Amount. The table lists three transactions: 'OtherItem' (100.00 EUR), 'Annual Fee A+ Lodged Account Package' (238.00 EUR), and 'Chargeback' (-100.00 EUR).

Traveller Name	Merchant Name	Transaction Type	Service Description	Exchange Rate	Settled Amount
21 March 2025		OtherItem		1	100.00 EUR 100.00 EUR
		Fee	Annual Fee A+ Lodged Account Package	1	238.00 EUR 200.00 EUR
		OtherItem	Chargeback	1	-100.00 EUR -100.00 EUR

Step 2: Entering missing DBI (reference fields)

You can enter missing DBI on this page, which displays all transactions with missing DBI:

1. View the number of transactions with missing DBI
2. Update the missing values in the fields outlined in red
3. Submit the changes to AirPlus

TRANSACTIONS FOR REVIEW

1 Transactions

Check transactions with missing data delivery.

We are missing mandatory data on the following transactions. Please check and provide details...

Card Number	Transaction Type	Exchange Rate	VAT	Settled Amount
26 June 2024				
122033xxxxx5159	Flight	1		-12.00 EUR -12.00 EUR
Source of Transaction: TAMARA MA		Remaining Days: -442		Document Number: 2406212001230
Passenger Name: Test/Flight Mrs		Purchase Date: 05.06.2024		
Cost Centre:	DE1234	Accounting Unit:	Marketing	Project Number: DE123456789
Action Code:	ABC			

3

Submit

Step 3: Submitting updated transactions

You will receive confirmation that the update was successful. All fields updated in the AirPlus systems will be included in the next statement.

Please note:

- **All DBI fields** with missing data, including travel agency number (NR field), can be updated.
 - Updates to transactions are possible as long as the **transaction has not yet been settled**.
-

WIR HABEN IHREN ANTRAG ANGENOMMEN.
WERDEN DIE FOLGENDEN TRANSAKTIONEN
VERBESSERT.

Die Aktualisierung der Descriptive Billing Information
(Zusatzdaten) kann einige Minuten dauern. Bitte beachten Sie,
dass die Werte danach nicht mehr aktualisiert werden können.
