AirPlus Portal: Overview of Roles and Rights

AirPlus

AirPlus Portal: Overview of Roles and Rights

Overview of current roles

The following roles have been predefined in the AirPlus Portal:

- Program Manager
- Portal Administrator
- Card Administrator
- Electronic Billing User
- Accountant
- Intelligence User
- Card User (Corporate Cards)
- Card User (Virtual Cards)

- New users and permissions can be created by the Program Manager and Portal Administrator.
- Each AirPlus Portal user is assigned to one or more role(s) with a set of predefined functions. All portal functions can be assigned and executed via these predefined roles.
- Additionally, each user can be assigned to certain agreements, products and AirPlus frameworks in order to limit his permissions.
- Users who have more than one role can switch between the roles using the "Change Portal View" function in their profile menu.

Program Manager (PM)

[Back to the overview](#)

The role of the Program Manager is the first user in the AirPlus Portal. As a superuser, this role has the most comprehensive rights. It has access to all functions and can administer all other portal roles and users.

• Managing card and account programs at an operational level • Viewing authorizations and transactions • Disputing transactions	• Generating and viewing Virtual Cards on assigned frameworks • Blocking cards • Defining security and card settings for card usage (e.g. Descriptive Billing Information (DBI) and validity period)	• Managing and sending out card applications with pre-approval (access to User Management) • Viewing assigned card programs • Defining security and card settings for card usage (e.g. Descriptive Billing Information (DBI), limit) • Temporarily/permanently blocking cards and ordering replacement cards • Pulling Delinquency Reports	• Viewing cards/Accounts • Create new cards/Accounts • Defining settings (e.g. Descriptive Billing Information (DBI), limit) • Enhancing transactions with DBI • Temporarily blocking * The permission of this role can be restricted for Lodged Products at card/Account level.

Electronic Billing User (EBU)

[Back to the overview](#)

The role of the Electronic Billing User is authorized to manage statements and electronic billing data for assigned AirPlus products or frameworks.

General rights

- Viewing and downloading electronic billing files
- Viewing and downloading statements

Accountant (ACC)

[Back to the overview](#)

The role of the Accountant has access to all features required to administer statements within an authorization.

General rights*

- Viewing and downloading statements
- Viewing and downloading dunning letters
- Viewing authorizations and transactions
- Disputing transactions

* The permission of this role can be restricted for Lodged Products at card/Account level.

Intelligence User (IU)

[Back to the overview](#)

The role of the Intelligence User is specific to the AirPlus Intelligence product. This role has access to the AirPlus Intelligence Hub and other modules upon request.

By default, the role only sees anonymized data in AirPlus Intelligence.

General rights

- Access to AirPlus Intelligence
- Access to the Data+ module (if available)

Card User (Corporate Cards) (CUC)

[Back to the overview](#)

The Card User is the user of an AirPlus Corporate Card.
Its rights in the portal depend on the card type.

Specific Rights for AirPlus Corporate Cards

- Viewing authorizations and transactions
- Viewing and downloading statements
- Disputing transactions
- Viewing payments
- Viewing and changing PIN
- Viewing limit
- Defining security and card settings for card usage (e. g. restricting online payments, restricting countries, Descriptive Billing Information (DBI))
- Editing personal details (e. g. Private Address, Bank Account, 3D Secure-Profile)
- Temporarily/permanently blocking cards, ordering replacement cards and canceling cards (depending on card type)

Card User (Virtual Cards) (CUV)

[Back to the overview](#)

The Card User is the holder of an AirPlus Virtual Card.

Specific Rights for AirPlus Virtual Cards

- Creating virtual cards for own use within a given budget and time frame
- Viewing own virtual cards
- Viewing authorizations and transactions
- Downloading virtual card PDFs
- Creating 3D Secure profiles
- Customizing card settings: Descriptive Billing Information (DBI) and validity period
